

Hello

The service proposed here just plain makes no sense. Even here in my semi-rural environment the air is plagued with noises of all kinds. Most of these come from the power company's illegal use of the HF spectrum, ie, radiating noise from power lines. It's already quite cluttered. I cannot imagine how this proposal got past the light of day. Halt this egregious abuse of the spectrum now, before it's too late and we naysayers are proven correct.

Thanks for your time
